

Your Travel Dashboard

“If you can’t measure it, you can’t control it!”

We encourage you to access & use the real-time online dashboard & reporting tools available to you 24/7. Below is a sample of the dashboard and reporting we provide clients which you’re able to customize with hundreds of data points to manage your travel activity, costs, vendor usage etc.

The Dashboard has 9 different programmable windows which can display hundreds of different data points depending upon you’re the benchmarks you are most interested in accessing.

There are over 700 reports available within the system and if you are still not able to find what you are looking for within those 700 reports, we have the ability to custom build a report to fit your exact needs.

You also will have access to a “scheduling” feature. Any standard or custom report can be put on an automatic schedule. Each report can be generated in Excel, PDF, Word or CSV file. We can schedule any reports to automatically be emailed daily, weekly, bi-weekly, quarterly and yearly.

“Where Are My Travelers” is another element available to you via the dashboard and will support your company’s commitment to Duty of Care. Now in a moment’s notice you can find your travelers wherever they may be in the world!
